  2023
- **Architect**
  FWB Architekten, Hausmannstätten
- **Contractor**
  KAPO Fenster und Türen GmbH, Pöllau
- **Building owner**
  Council Thal
- **Viewing possible?**
  No

Description

The Thal Kindergarten in Styria is an outstanding example of sustainable and child-friendly construction. Designed by FWB Architects, the new building responds to the growing demand for childcare in the region and sets new standards in terms of both architecture and education. Four identical group rooms are grouped around a central atrium – the “Platzl” – with direct visual contact and plenty of daylight. Large windows, an airy gallery level for each group room, a covered entrance area, and attractive outdoor spaces create an ideal space for early childhood learning and play. The use of wood as a natural building material underscores the project's commitment to nature. A photovoltaic system and an air-source heat pump ensure that the building is particularly energy-efficient.
